

Operix

SUMMARY

Operix is a unified business operations platform designed to help service-based businesses manage employees, projects, workloads, attendance, payroll, clients, and operational reporting from a single system.

The goal is to eliminate the need for multiple disconnected tools and spreadsheets.

TARGET USERS

Primary Users

Business Owners: Need visibility into projects, employees, attendance, and payroll. Operations Managers: Manage resources, employee utilization, and company performance. Project Managers: Manage project delivery, task assignments, and timelines. HR Managers: Handle employee records, attendance, leave, and payroll. Employees: Track tasks, attendance, leave requests, and payroll information. Clients: View project progress and provide approvals.
